Go flock yourself! A fun game that reminds me of the old puzzle days in the early 2000s... A grand flocking time that was. Now go out there and abduct some sheep, you mother flocker you!. Game is too expensive with barely any players, by the time you get games you can't even refund it after your first impressions. It's weird that I can only have 2 hours to try this game before refunding it, that is just so dumb because you can barely do anything in 2 hours. First I needed to do a tutorial then I had to find a player online, I thought I could refund at 3-4 hours but I got an email back from Steam that I surpassed 2 hours so now I'm just stuck with this. I like the horror aspect of the game but wasn't to sure about the fps having a gun and being able to shoot things, it would of been good to just have the few creepy sightings that happen throughout the game but I am looking forward to the 2nd chapter.

<https://youtu.be/veenBV4xikDg>. This is possibly the worst 4x I've ever played. And I've played a LOT of them.

[Very first game I was beaten back to my home system before realizing that debt only hurt research and had no limit, so proceed to run nine shipyards at full capacity for the remainder of the game and conquer the galaxy. Finished with so much debt the game had trouble displaying my money properly. There are no 'subgames' to keep you occupied outside of the primary loop so there is nothing else to it that might distract you. I would not recommend this to anybody, ever.. Outstandingly Good. Frustrating at times, but does an excellent job at keeping you immersed. One recommendation, remember that it's a game and don't freak out if something bad happens.. Poison. Traps. Disease. Unopenable doors. Unopenable chests. Unopenable barrels!](#)

[Monsters you have to kite around. Resting constantly to recover health. Taking damage from hitting a barrel with an axe!](#)

[Merchants in a remote village who somehow have nothing you can afford, like the only car dealer in town is Rolls Royce.](#)

[All of this only comes after unending, boring travel.](#)

[Yes Eschalon is an old-school RPG ... with all the boredom and frustration that came with those games.. This is not a farm game for me.](#)

[I'm a huge fan of Stardew valley, Harvest moon games and other many good farm games.](#)

[But this.....](#)

[no. Are you an English speaking anime fan?](#)

[Are you familiar with Melty Blood, Guilty Gear or Blazblue?](#)

[Then I recommend the hell out of this game.](#)

[For extra enjoyment, be familiar with pre-internet anime](#)

[Have at least 1+ years experience playing fighting games](#)

[Preferably at arcades, or online with an arcade stick](#)

[To get my arcade stick working, I had to use JoyToKey and plug in my stick AFTER launching the game.](#)

[If you are intimate with KOF Extra System\\S Groove, you are ready to play. Just be prepared for speeds faster than Street Fighter Alpha 3 in Turbo.](#)

[If the term Hit Frame makes you scratch your head, or you don't know who Daigo is, you're gunna have a bad time, like all those negative reviewers below.](#)

Great game. Has a great soundtrack too. Cant wait to play more of it.. This game runs so slowly that it is unplayable. You need to click several times on any item for the command to be taken into account. Every tiny single action takes litterally ages.... Risk of Rain is simply the best.

It gets your endorphins moving, gets you smiling, and makes you very upset when you clearly lack skills. When you do manage to make your skills work though, you can still get destroyed by the right combo of bosses.

Unless of course you only use Glass and Command, in which case the game is a piece of cake and all achievements can be gotten solo EASY. Like, **REALLY** easy. **If you want a challenge, either play with all or none of the artifacts.. If you're looking for a punching workout game, this is it. Recently added hammer fist and uppercut bombs along with a 180 degree mode, which I think is better until this goes wireless.. Truly a masterpiece. For me, this is the only game whose storyline can rival books such as 1984 and Brave New World. Sure, there's some bad dialogs and voice acting here and there, but, overall, the writing is very good and mature.**

Gameplay-wise, there's a nice balance between FPS, RPG, adventure/exploring. It's not a fast-paced shooter, but it's not an RPG that throws a wall of text on your screen either. Stealth is a big part of the gameplay, and sometimes it's better to simply avoid enemies; the final missions are action-packed, though.

Some negative reviews emphasize the nostalgia as being the reason why this game well regarded, but I first played it in 2016 and loved it.. I used to play this game years ago and loved it. Unfortunately it does not run well on modern hardware.

Game is very unstable in Windows 10 and crashes frequently even when ran in compatability mode.

. Nice pant-♥♥♥♥♥♥ spooder experience. Spooed me more than A Chair in a Room. Would def. buy the full game but we all know it will never come.
